

NUMAN ANJUM

Frontend Developer

Islamabad | nomananjum433@gmail.com | 03436467801

PROFILE

BSIT graduate specializing in Frontend Development in React.js, JavaScript, HTML5, and CSS3. Experienced in developing interactive web interfaces and React-based applications with clean component structures and user-focused designs. Strong foundation in modern frontend development with a focus on building functional, responsive, and maintainable web applications.

PROJECTS

Final Year Project | E-Commerce Website 2025

- Developed a React.js e-commerce frontend with reusable components for organizing products and application sections, enhancing code maintainability.
- Built product-focused interfaces using JavaScript, HTML5, CSS3, and React.js, emphasizing clean and efficient frontend code.
- Implemented React Router to manage multiple application views, providing structured navigation between pages.

Coffee Shop Website 2024

- Developed a coffee shop website using HTML5, CSS3, and JavaScript, featuring structured pages and reusable UI sections to enhance user experience.
- Implemented responsive layouts and interactive navigation, resulting in a smooth browsing experience across devices.
- Utilized JavaScript to add dynamic frontend interactions, significantly improving page functionality.
